Frameworks: Django, FastAPI, Tensorflow, Keras, scikit-learn, NumPy, Pandas
Technologies: Git, Docker, Linux, AWS, PostgreSQL

EDUCATION

Sk College of Science and Commerce	2019-2022
BSc In Computer Science	CGPA: 7.37

WORK EXPERIENCE

360 DigitMg	Sep 2023 - Nov 2023
Data Analyst Intern	Remote, INDIA

- Working closely with a team of engineers to accelerate the research process for the Healthcare Manufacturing team.
- Integrated credible sources to detect which Product is getting returned every time.
- Helped to Find what could be the main reason of the product getting returned.

My Service	Aug 2022 – Aug 2023
Data Operations	Remote, INDIA

- Worked on utilizing Excel formulas and pivot tables to manipulate, analyze, and present large datasets for insightful reporting and decision-making.
- Ensured data accuracy and reliability through meticulous validation processes, contributing to the creation of trustworthy analyses and reports.
- Streamlined data processing workflows through automation and advanced Excel techniques, fostering collaborative efforts to meet organizational objectives effectively.

PROJECTS

Movie Recommender System | [Source Code](#) | *(Python, Streamlit, API)*　　　　*2024*
- A Content based Recommender System which Recommends Movie through Machine Learning Algorithms.
- Streamlit is used for the Frontend and pickle to fetch the backend code.
- TMDB API is used to get the Images as the Recommendations.

Customer Churn Prediction | [Source Code](#) | *(Python, Machine Learning)*　　　　2023
- The Project tells us what type of Customers are Churning from the Company.
- I Have Used Multiple ML Algorithms to check and got the logistic Regression as the main algorithm.

[Nutree Smoothiees](#) | [Source Code](#) | *(Html, CSS, JavaScript, API, Git)*　　　　Present
- Built the Nutree Smoothie Website for the Nutree Client.
- Worked in the team of 3 people for Creating a Dynamic Smoothie Website
